

Practical task

Note:

1. User codeigniter/Laravel framework
 2. Do not copy from internet.
 3. Max time 3 hrs
 4. Add proper comment and variable name should be readable form.
-
1. Create admin module and add product as category wise.
 2. When add project there will option as gift. (optional)
 3. Display product in the front-end as category wise.
 4. Create rule in the backend. Rule: - when any one add particular category (Select category) product in the cart with required quantity it should auto add as gift. (Gift product should be 0).
Example: When I add Mobile (Category) product in the cart and admin created rule for the category (Rule is add mobile any product in the cart with 5 minimum qty product charger should auto add as gift).
 5. Create checkout use COD and display in admin. (No Login required fill shipping details).

THANKS YOU || BEST OF LUCK
